

Discussion

- Example: Airline Reservation Service

- Suppose that an airline wants to create a telephone reservation system for customers to call in and make flight reservations.
- The airline wants to ensure that its premier members get immediate service, its frequent flyer members get expedited service and all others get regular service.
- There are two main approaches to implementing the reservation service...

Question

- Design non-REST and RESTful approaches for
 - Telephone based reservation system
 - Web service based reservation system
